I² Intelligent Interweaving Printing Technique

Patented "I²: Intelligent Interweaving Printing Technique," virtually eliminates vertical and horizontal banding. Traditional ink jet printers lay ink down in a straight line making it easy for your eyes to see stripes in the print. This new printer function enriches colors making the black ink darker and the reds brighter than ever.

The ValueJet line saves time and money by providing flexibility and ease of use, performing specific jobs with hassle free operator supervision and low maintenance.

- Innovative X-rail design and new piezo-print head technology allows for increased print speeds and exceptional image quality.
- The 540x720 dpi mode, is just one of 10 print modes, printing variable dot resolutions up to 1440 dpi.
- Enjoy three individually controlled heaters for immediate drying, improved paper feed accuracy, and a compact design.
- Load your ValueJet 1204-48" and 1604-64" media up to 51" and 64" wide respectively.
- 4 - 3'x10' Banners per hour.
- IMMEDIATE ROI!
- Patented Intelligent Interweaving Printing Technique
- Starting at \$14,995!!!
